When learners engage in innovation, creativity and entrepreneurship, they:

- Contribute solutions to complex problems
- Enhance concepts, ideas, or products
- Take risks in thinking and creating
- Make discoveries through inquiry research
- Pursue new ideas to meet a need of a community
- Lead and motivate with an ethical, entrepreneurial spirit

Why is it important?

As the challenges of our society are continuously changing, and students can expect to have multiple careers, they will need to approach their futures with confidence to take risks, try new things, be creative and be entrepreneurial.

The Student Experience

- Approaches complex problems with an openness to try new things
- Questions issues within their daily life to seek new solutions
- Engages with the community to understand current and future needs
- Demonstrates ethical behaviour in work that is undertaken

The Teacher Experience

- Promotes curiosity, questioning and creativity over memorization and rote learning
- Provides adaptive and flexible classroom experiences over fixed assignments and tasks
- Uses well-developed questioning skills to encourage deeper thinking for students
- Provides classroom spaces to encourage inquiry and discussion around complex problems
- Supports risk taking by valuing both the process and the product of the work being undertaken
- Connects with the local community to see potential alignment to the curriculum
- Encourages students to be constantly looking to improve the world around them
